

Enrollment is Now Open!

KHC is conducting its fourth breakthrough collaborative with national expertise, a roadmap and support designed to help organizations learn about key Patient and Family Engagement concepts and practices, and to take steps to establish an active Patient and Family Advisory Council (PFAC) and/or other quality committees where patients are represented. To date, more than 80 Kansas hospitals have participated in one or more of the previous three cohorts conducted since 2015.

Hospital participants receive training, resources and ongoing support

Collaborative Goal

To assist hospitals in the KHC Hospital Improvement Innovation Network (HIIN) develop a Patient and Family Advisor Program, or evolving an existing program, by identifying best practice strategies for partnering with patient and family advisors, including patient and family advisory councils (PFAC), patient and family representatives on internal committees/boards, and focus groups.

Collaborative Resources

- ❖ National Faculty
- ❖ Quarterly Learning Sessions
- ❖ Monthly Coaching Calls
- ❖ Peer-to-peer Sharing
- ❖ Video Training Modules
- ❖ Online Toolkit
- ❖ Dedicated ListServ®
- ❖ Private KHC web page
- ❖ Targeted site visits
